# Practice Makes Perfect

We know you count on your medical dictionary. That's why we made Stedman's 23 as perfect as we knew how.

Drawing upon the combined assets of man and computer, Stedman's captures the total spectrum of terminology relevant to the life sciences. Each definition has been reviewed by as

many as five medical specialists to ensure proper coverage for subjects in overlapping fields.

Late developments in medical research have provided more than half of the 28,000 new or revised entries. Many of these terms are so current that they were still being entered as the main vocabulary was

prepared for press.

Make it your practice to use Stedman's. We've made perfecting it part of ours.

April 1976, 90,257 entries, 358 illustrations with 31 color plates, 1678 pages, \$26.50

# For the Mouse Immunologist

from CEDARLANE

## LOW-TOX RABBIT COMPLEMENT

FOR USE WITH MOUSE LYMPHOCYTES

- Low toxicity to mouse lymphocytes
- High complement activity
- Designed for use with cytotoxic antisera to mouse lymphocytes

CL 3051 5 x 1 ml, lyophilized \$30.00

## ANTI-MOUSE T-CELL SERUM

RABBIT ANTI-MOUSE BRAIN ASSOCIATED THY-1 ANTISERUM

- Strongly cytotoxic to thymocytes and peripheral T-lymphocytes
- Thoroughly absorbed to remove cross-reactivity to B-lymphocytes

CL 2001 1 ml, lyophilized \$ 25.00  
CL 2005 5 ml, lyophilized \$100.00

## LYMPHOLYTE-M

FOR THE ISOLATION OF VIABLE MOUSE LYMPHOCYTES

- Isolation of viable lymphocytes from all mouse lymphoid tissues
- Removal of dead cells in sequential cytotoxicity studies
- Removal of dead cells from lymphocyte cell cultures

CL 5030 5 x 30 ml, sterile \$50.00

## CEDARLANE CYTOTOXICITY MEDIUM

FOR CYTOTOXICITY ASSAYS UTILIZING MOUSE LYMPHOCYTES

- Medium designed specifically for use with cytotoxic antisera to mouse lymphocytes
- Contains HEPES buffer to maintain pH
- Contains BSA to reduce background toxicity

CL 95100 5 x 100 ml, sterile \$25.00

## HEMO-LO GUINEA PIG COMPLEMENT

FOR SENSITIVE SRBC PLAQUE ASSAYS

- Low background hemolysis, pre-absorbed with SRBC
- High complement activity
- For plaque assays utilizing free or haptenated SRBC

CL 4555 5 x 5 ml, lyophilized \$60.00

## RABBIT ANTI-MOUSE IMMUNOGLOBULIN ANTISERUM

- Polyvalent, high titer, specific
- Uses: Developing serum for IgG-pfc  
Second antibody for mouse alloantisera  
B-cell studies  
Immunodiffusion techniques

CL 6002 2 ml, lyophilized \$25.00

# IMMUNOCHEMICALS FROM MILES?

**YES, INNOVATIVE AND PROVEN  
PRODUCTS FOR RESEARCH AND  
CLINICAL LABORATORY USE.**

Perhaps you think of Miles as a place to get the unusual, like antiserum to rat IgE or equine IgM.

Perhaps you know we offer a wide selection of human protein antisera encompassing newer products, such as antisera to myoglobin, ferritin and  $\beta$ -2 microglobulin, as well as established antisera to immunoglobulins,  $\alpha$ -1 antitrypsin and other major serum proteins.

Of course, you may not associate us with immunochemicals at all... We think you should.

# MIX AND SPIN PERCOLL<sup>TM</sup>

**A new density gradient medium which makes centrifugation simpler, quicker and gives much greater resolution than you ever thought was possible.**

- Self-generating gradients in 30 minutes or less
- Isoosmotic throughout the gradient
- Non-toxic to cells and viruses
- Does not interfere with enzyme assays or quench radioactivity
- Low viscosity for rapid isopycnic or rate zonal separations
- Suitable for cells, viruses and subcellular particles

# New Counting System For The Immunology Laboratory

Hemolytic Plaques  
Nucleated Cell Counts

Leukocyte Adherence Inhibition  
Radiographic Grain Counts

## ARTEK COUNTER MODEL 980

Large LED Readout  
displays the count.

### VISUAL DISPLAY OF PLAQUES BEING COUNTED

Electronic Window displays  
the Counting Area.

Position Size and Shape of  
Electronic Window  
determined by Operator.

Illuminated dots above and  
to the right of Plaques inform  
Operator that plaques are  
counted.  
Assures Accuracy.

Positive tuning indicator  
informs Operator that  
sensitivity setting is set  
correctly.  
Eliminates Operator error.

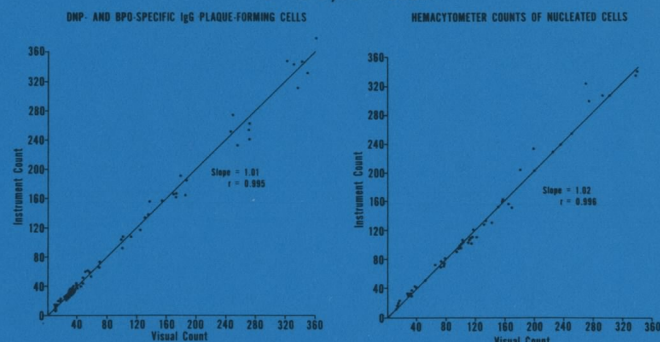

Accurate and reproducible  
counts are made in a few  
seconds by simply  
depressing the count button.

### OPTICAL TABLE

Increases  
magnification to count  
extremely small  
plaques.

Accuracy of instrument counting Hemolytic Plaques and  
nucleated cells in a Hemocytometer.\*

\*David H. Katz et al., 1977, Journal of Immunological Methods, 17, 283-289

### MICRO COUNTING

Expands the capability  
of the system; count  
nucleated cells in  
suspension, count  
autoradiographic  
grains and LAI Analysis.

### MODEL 700 COMPU-PRINT

Greatly Expands Systems  
capability  
Provides Hard Copy  
Alpha Numeric Printing  
Statistical Values on data  
supplied by 980.

5.8ml of clear  
reagent in a  
standard pipette.

# 5.8ml of clear reagent in a new STRIPETTE™ pipette.

It's the color stripe, magnified by the reagent, that lets you see the meniscus easier and pipette more accurately.

Stripette serological pipettes are the first basic improvement in pipettes in years. Simple, ingenious, effective. Now you can pipette faster and more reliably.

Disposable Stripettes are available in three sizes, each with a different color stripe for quick identification: 10ml in 1/10ml, 5ml in 1/10ml, and 1ml in 1/100ml. They're sterilized, plugged, and come individually wrapped or cannister-packed.

Stripettes now make ours the most complete line of innovative, highest quality disposable plastic labware: Cluster plates, dishes, flasks, Leighton tube (the only plastic disposable one), and three sizes of easy reading serological pipettes.

# INFECTION and the COMPROMISED HOST

Edited by James C. Allen, MD

*Infection and the Compromised Host* discusses the subject of immunology from a seldom-seen viewpoint. Its primary focus is on those clinical situations in which host defenses against infection are impaired. In the exposition of impaired response there is an extensive review of host defense mechanisms and current understanding of their functional significance, as well as those situations in which heritable defects or chemotherapy are associated with increased susceptibility to infectious diseases.

A multicontributor effort, with each author a recognized authority in the overlapping fields of microbiology, medicine, infectious diseases, pediatrics, dermatology, laboratory medicine, and pathology, *Infection and the Compromised Host* is brought together by its unifying concern with infection as a clinically important determinant of life or death in the patient who is afflicted with an impairment in his defenses.

While other texts in the field are primarily concerned with normal host defenses, *Infection and the Compromised Host* is not; with its comprehensive examination of impaired defense it adds a vast amount of new source material to the literature. By raising the questions it does, the state of knowledge in this crucially important medical area will be accurately characterized.

1976 / ISBN 0-683-00073-X

## CURRENT TOPICS IN IMMUNOLOGY

Each volume in this outstanding series provides careful and complete coverage of the immunological approaches to its particular topic. This series clearly illustrates how modern immunological thought influences day-to-day practices in both the clinical laboratory and the on-going practice of medicine.

**Volume 1: The Practice of Clinical Immunology** Thompson/1974/144 pages/illustrated/\$16.50

**Contents:** Preface. Abbreviations. The Immunologist in Medicine. Physiology of Immunity. Immunological Mechanisms in Disease. Antigen-Antibody Reactions. Laboratory Investigations in Clinical Immunology: I. Antibodies; II. Immunoglobulins; III. Immuno-Fluorescent Examination in Biopsy Material; IV. Complement; V. Cells. The Clinical Approach. Associated Tests (Immunochemical Assessment of Plasma Proteins). Bibliography. Index.

**Volume 2: Cancer and the Immune Response** Currie/1974/108 pages/illustrated/\$15.50

**Contents:** Introduction. Tumour-Specific Antigens in Experimental Animals. Host Resistance and the Immune Response. The Antigenicity of Human Tumours. Effector Mechanisms in Tumour Immunity. Immunological Escape of Tumours. Immunotherapy of Human Cancer: Prospect and Retrospect. Immunodiagnosis. Index.

**Volume 3: Blood Group Topics** Dodd & Lincoln/1975/141 pages/illustrated/\$16.50

**Contents:** Introduction to Blood Groups. Antigens and Antibodies. Antigen-Antibody Reaction. Immune Response. General Principles Underlying Blood Grouping Techniques. Structure of Various Blood Group Systems. Choosing Blood for Transfusion and Compatibility Tests. Incompatibility. Haemolytic Disease of the Newborn. Serology of Auto-Immune Haemolytic Anaemias. Relationships Between Blood Groups and Various Diseases. Blood Groups in Problems of Doubtful Paternity. Basic Techniques. Useful Definitions. Index.

**Volume 4: Organ Grafts** Calne/1975/80 pages/illustrated/\$11.95

**Contents:** Ethical and Legal Aspects of Clinical Organ Grafting. The Immunological Background of Organ Grafting. Experimental Organ Grafts and Immunosuppression. Organ Preservation. Clinical Renal Transplantation. Clinical Heart Grafting. Clinical Liver Grafting. Transplantation of the Pancreas, Lung, and Intestine. Future of Organ Grafting. Index.

**Volume 5: Allergic Drug Reactions** Amos/1976/142 pages/illustrated/\$17.00

**Contents:** Problem of Adverse Drug Reactions. Hypersensitivity Mechanisms Responsible for Tissue Damage. Clinical Manifestations of Adverse Drug Reactions. Formation of Drug Antigens. Antigenic Determinants of the Penicillin Molecule. Diagnosis of Allergic Drug Reactions. Management of Allergic Drug Reactions. Methods for Investigating Type I Allergic Drug Reactions. In Vitro Investigations of Type II Tissue Damage Induced by Drugs. In Vitro Detection of Type III Allergic Tissue Damage Induced by Drugs. Type IV Allergic Drug Reactions. Future Prospects.

**Volume 6: Immunodeficiency** Hayward/1977/215 pages/illustrated/\$17.50

**Contents:** Immunity. Development of Immunity Mechanisms. Defined Types of Primary Specific Immunodeficiency. Antibody Deficiency. Combined Immunodeficiency Syndromes. Primary Immunodeficiency Affecting Predominantly Cell-Mediated Immunity. Other Primary Disorders Associated With Defects of Specific Immunity. Primary Defects of Nonspecific Immunity Mechanisms. Secondary Immunodeficiency. Associations of Immunodeficiency. Diagnosis. Treatment. Index.

**Volume 7: Immunology of Rheumatic Diseases: Aspects of Autoimmunity**

Maini/1977/138 pages/illustrated/\$16.00

**Contents:** Biological Aspects of Immune Response. Mechanisms of Tissue Injury. Immune Reactions to Autoantigens. Immunological Methods. Rheumatoid Arthritis. Systemic Lupus Erythematosus. Sjogren's Syndrome. Polymyositis and Myasthenia Gravis. Relapsing Polychondritis. Infections and Arthritis. Vasculitis and Polyarteritis Nodosa. Therapeutic Implications. Genetic Factors, Immune Response, Complement Deficiency and Susceptibility to Inflammatory Rheumatic Diseases. Appendix. Index.
