INFECTION and the COMPROMISED HOST

Edited by James C. Allen, MD

Infection and the Compromised Host discusses the subject of immunology from a seldom-seen viewpoint. Its primary focus is on those clinical situations in which host defenses against infection are impaired. In the exposition of impaired response there is an extensive review of host defense mechanisms and current understanding of their functional significance, as well as those situations in which heritable defects or chemotherapy are associated with increased susceptibility to infectious diseases.

A multicontributor effort, with each author a recognized authority in the overlapping fields of microbiology, medicine, infectious diseases, pediatrics, dermatology, laboratory medicine, and pathology, *Infection and the Compromised Host* is brought together by its unifying concern with infection as a clinically important determinant of life or death in the patient who is afflicted with an impairment in his defenses.

While other texts in the field are primarily concerned with normal host defenses, *Infection and the Compromised Host* is not; with its comprehensive examination of impaired defense it adds a vast amount of new source material to the literature. By raising the questions it does, the state of knowledge in this crucially important medical area will be accurately characterized.

Two New Additions to *The Clinical Concepts In Medicine* Monograph Series

CLINICAL CONCEPTS OF INFECTIOUS DISEASES Second Edition

Edited by Leighton E. Cluff, MD and Joseph E. Johnson, III, MD

The thirty-two contributing authors of *Clinical Concepts of Infectious Diseases* have brought their considerable experience and expertise to its writing under the editorship of Drs. Cluff and Johnson. . . . The result is a compendium of information no clinician should be without.

Contents Epidemiology and Pathogenesis of Infectious Diseases: Introduction. Clinical Epidemiology. Microbial Determinants of Infection. Phagocytic System. Circulatory Immune System. Secretory Immune System. Cellular Immune System. Immunologic Consequences of Infection. General Problems of Infectious Diseases: Introduction. Fever and Acute Phase Reactions. Microbemia and Microbial Shock. Dermatological Manifestations of Infection. Hematological Manifestations of Infection. Recovery from Infection. Specific Problems of Infectious Diseases: Introduction. Opportunistic and Wound Infections. Influenza and Other Viral Respiratory Infections. Streptococcal Infections and Complications. Acute Pulmonary Infections. Chronic Pulmonary Infections: Tuberculosis and Histoplasmosis. Infectious Diarrheas. Viral Hepatitis. Urinary Tract Infections. Venereal Infections (Sexually Transmissible Disease). Meningitis and Encephalitis. Infectious Mononucleosis. Infective Endocarditis. Management and Prevention of Infectious Disease: Introduction. Antimicrobial Therapy. Systemic Mycoses and Antifungal Therapy. Antiviral Therapy. Untoward Consequences of Antimicrobial Therapy. Isolation of the Infected Patient. Immunization Procedures. Tabulation and Other References of Infectious Diseases: Introduction. Tabulation of Infectious Diseases. Selected References. Index.

1978/545 pages/11 illustrations/\$22.50

CLINICAL CONCEPTS OF IMMUNOLOGY

By Robert H. Waldman, MD

A concise yet comprehensive reference covering the basic science and the concepts of immunology as it relates to clinical practice. Written in a clear and readable style, *Clinical Concepts of Immunology* is a primary reference of the important clinical correlations of basic immunology and, as such, belongs in the library of every specialist who must deal with the complex diagnosis and treatment of patients with immunologic disorders.

Contents The Immune Systems — An Introduction. Cell-Mediated Immunity: Congenital Deficiency States in Cell-Mediated Immunity. Cell-Mediated Immunity — Acquired Deficiency States. Tumor Immunology. Transplantation Immunology. Passive Enhancement of Cell-Mediated Immune Response. Diseases of Aberrancy of Cell-Mediated Immunity. Humoral Immunity: Function of the Humoral Immune System. The Complement System. Humoral Deficiency States. Passive Enhancement of Humoral Immunity. Active Immunization. Immune Complex Diseases. Autoantibodies and Human Disease. The Acute Allergic Response — Mediators of Acute Inflammation. Drug Allergy. Section of the Phagocytic System: The Phagocytic System and Host Resistance to Microbial Disease. The Neutrophil In Abnormal Host Resistance — Neutropenia and Abnormal Chemotax. Miscellaneous: Immunologic Aspects of the Spleen. Immunohematology. Non-Specific Immunity. Interferon and the Immune System. Evaluation of Patients with Immunologic Diseases. Index.

THE JOURNAL OF IMMUNOLOGY®

INFORMATION FOR CONTRIBUTORS

Manuscripts should be sent to:

Dr. Joseph D. Feldman
Department of Immunopathology
Scripps Clinic and Research Foundation
La Jolla, California 92037

If and when the manuscript is published, it will become the sole property of The Journal and all copyright will be taken out in the name of The Williams & Wilkins Company, and all rights in copyright reserved to The Williams & Wilkins Company.

Contributions may be short or long; the length should be commensurate with the scientific content. The chief criteria for acceptance are quality, originality, and clarity.

INSTRUCTIONS FOR PREPARATION OF MANUSCRIPT

The *original and two (2) copies* of the manuscript, including references, legends, figures and illustrations must be submitted. The text and all other material, e.g., footnotes, references, and acknowledgments, must be typed in double space (at least $\frac{3}{16}$ -inch or 5-mm spacing from the bottom of one line to the top of a capital of a succeeding line) on one side of $8\frac{1}{2}$ inch x 11 inch paper of good quality. The two (2) copies may be legible carbon or mimeographed copies or photocopies.

A short title to be used as a running head (not more than 50 characters) should be typed alone on the first page. Type the complete title on the second page, and the authors' full names (first name, middle initial(s), surname) and affiliations on the third page. *The format of The Journal must be followed by typing the text and the list of references.* References will be numbered as they appear in the text and will be listed in the format:

1. Kindt, T. J., and W. J. Mandy. 1972. Recombination of genes coding for constant and variable regions of immunoglobulin heavy chains. *J. Immunol.* 108: 1110.

Only papers that have been accepted for publication should be listed in the references (i.e., articles that are already paginated or in press). Manuscripts in preparation, unpublished observations, and personal communications should be referred to as such in text; completed manuscripts that have been submitted for publication may be cited as a footnote to the text. If such information is in press when the author receives his galley proofs he may make appropriate citations in the text at that time.

All material to be set in a type size different from that of the text, such as tables, case histories, quotations, formulas, legends for figures and illustrations, footnotes, and references *must be typed on separate pages*. If abbreviations are to be used in the paper, the abbreviations and their meanings should be typed double spaced, in one paragraph, on a separate sheet. Legends should not be attached to or written on figures or illustrations and must be typed double spaced. The position of tables and figures in the text may be indicated on the page margin.

List all components of culture medium used in experiments so that sufficient data to reproduce reported re-

sults are available. This information may be supplied in the Abbreviations footnote, in a table listing all components, by referring to a published article containing the information, or by identifying the commercial source which supplies the specific medium if components are listed by the supplier.

Illustrations and Photomicrographs. Photographs of figures and other illustrative material *must be on glossy paper (in triplicate)*; they must be clearly marked on the reverse side with the number, author's name, and orientation (top) and should be unmounted. Graphs should be in black ink on unlined or bluelined paper. If graphs exceed 9 x 12 inches in size, they must be accompanied by glossy photographic reproductions within that size.

For photomicrographs a better grade of paper may be used at additional cost, up to \$100.00 for a single page. Estimates can be obtained when the manuscript is submitted for publication. Estimates for color photomicrographs are also available.

Communications. Short papers, at the author's request, may be printed in the Communications section of The Journal. These papers should not exceed two (2) printed pages in length, including summary, references, tables and figures. The text of a full printed page contains about 1000 words. If accepted, their publication will be accelerated, usually within two (2) months of acceptance. Suitability for publication will be judged on the basis of timeliness, novelty, and importance by the usual refereeing procedure.

Letters to the Editor. Letters, which will be printed at the Editor's discretion, are responses to articles that have been published in *The Journal of Immunology* and should relate to scientific matters.

Opinion. This is an invited brief summary and commentary of a controversial subject of broad interest to immunologists.

Workshops. The *Journal of Immunology* will publish abstracts of workshops that have been refereed by program committees of the workshops. These will be accepted if each abstract is prepared for photocopy, i.e., typed single spaced on a separate page. Charges will be the full cost of each printed page.

MANUSCRIPTS THAT DO NOT CONFORM TO THESE SPECIFICATIONS MAY NOT BE ACCEPTED, AT THE EDITOR'S DISCRETION.

Page Charges. Authors will be charged \$30.00 for each printed page of an article or a Communication. All manuscripts, if accepted, will be published only after commitment by the author(s) or financial officer of their institution to pay a charge of \$30.00 per published page. Under exceptional circumstances, page charges will be waived if deemed appropriate by an adjudicating member of the Editorial Board.

Reprints. Reprints must be ordered in advance. A form showing the cost of reprints, together with an order slip, is sent with the galley proof. No more than 1000 reprints of any article may be purchased. The invoice for reprints will include the charges for pages.

THE JOURNAL OF IMMUNOLOGY®

Information for Subscribers

Published monthly, beginning January, 1929. (From 1916 to 1925, and in 1928 Volumes I-X inclusive, and Vol. XV published bi-monthly.)

Annual Subscription Rates—U.S.A. AND POSSESSIONS: personal, \$80.00; institutional, \$100.00; single copy, \$9.00. FOREIGN: personal, \$90.00; institutional, \$110.00; single copy, \$10.00. Institutional (multiple reader) rate applies to libraries, schools, hospitals, clinics, group practices, and federal, commercial, and private institutions and organizations. A special rate of \$27.00 (\$39.00 foreign) for January to December 1980 is available to Students and Post-Doctoral Fellows. Certification forms may be obtained from the office of the American Association of Immunologists in Bethesda. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer. Dr. Henry Metzger, American Association of Immunologists, 9650 Rockville Pike, Bethesda, Md. 20014. All other subscriptions should be sent to the publishers.

Change of address: Publisher must be notified 60 days in advance. Journals undeliverable because of incorrect address will be destroyed. Duplicates can be obtained (if available) from the publisher at the regular price of single issues.

New subscriptions and renewals are entered to begin with the January or July issue, except for Student and Post-Doctoral Fellows.

Subscriptions should be renewed promptly: To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Microfilm. For availability, inquire of The Williams & Wilkins Company.

Reprints of individual articles are available *only* from authors.
