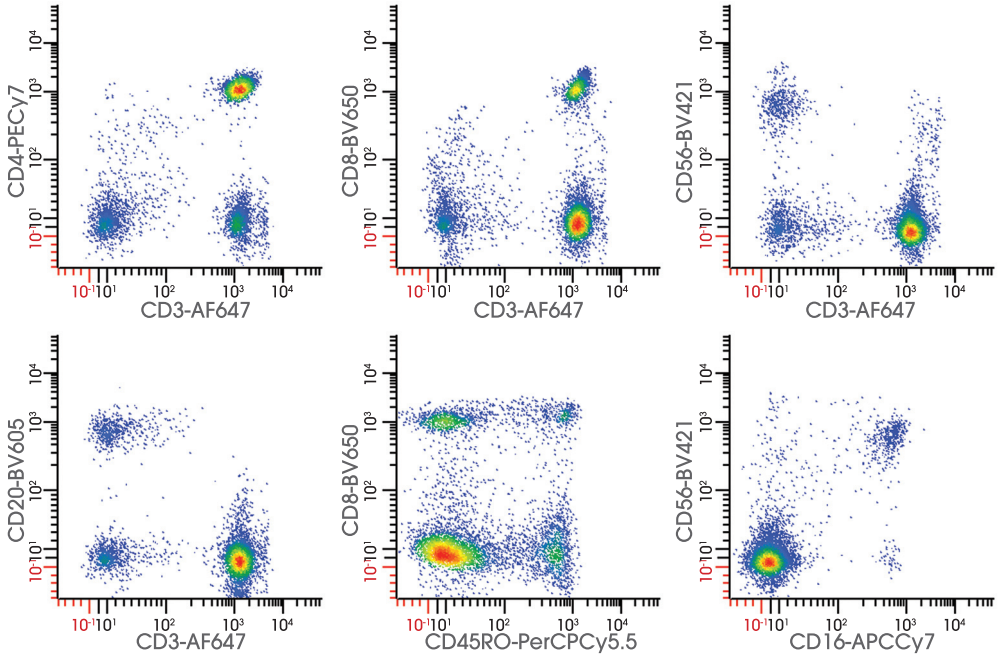
When color counts, count on iCyt to provide a full spectrum of colors for multi-laser work



Violet Laser

Brilliant Violet™ 421
Pacific Blue™
Brilliant Violet™ 570
Brilliant Violet™ 605
Brilliant Violet™ 650

Blue Laser

FITC, Alexa Fluor® 488
PE
PE-Cy5, PerCP
PE-Cy5.5, PerCP-Cy5.5
PE-Cy7

Green Laser

PE
PE-Cy5
PE-Cy5.5
PE-Cy7

Red Laser

APC, Alexa Fluor® 647
Alexa Fluor® 700
APC-Cy7

Our line of quality reagent products underscores our commitment to be your flow cytometry partner of choice.

- Over 8,000 quality monoclonal antibody products
- All the most popular clones for human, mouse, and rat research
- Many clones cross-react with non-human primates
- Support reagents for most flow cytometry applications
- Available in a cost-effective trial sizes
- Concentrated reagent in less volume for better multi-color mixing

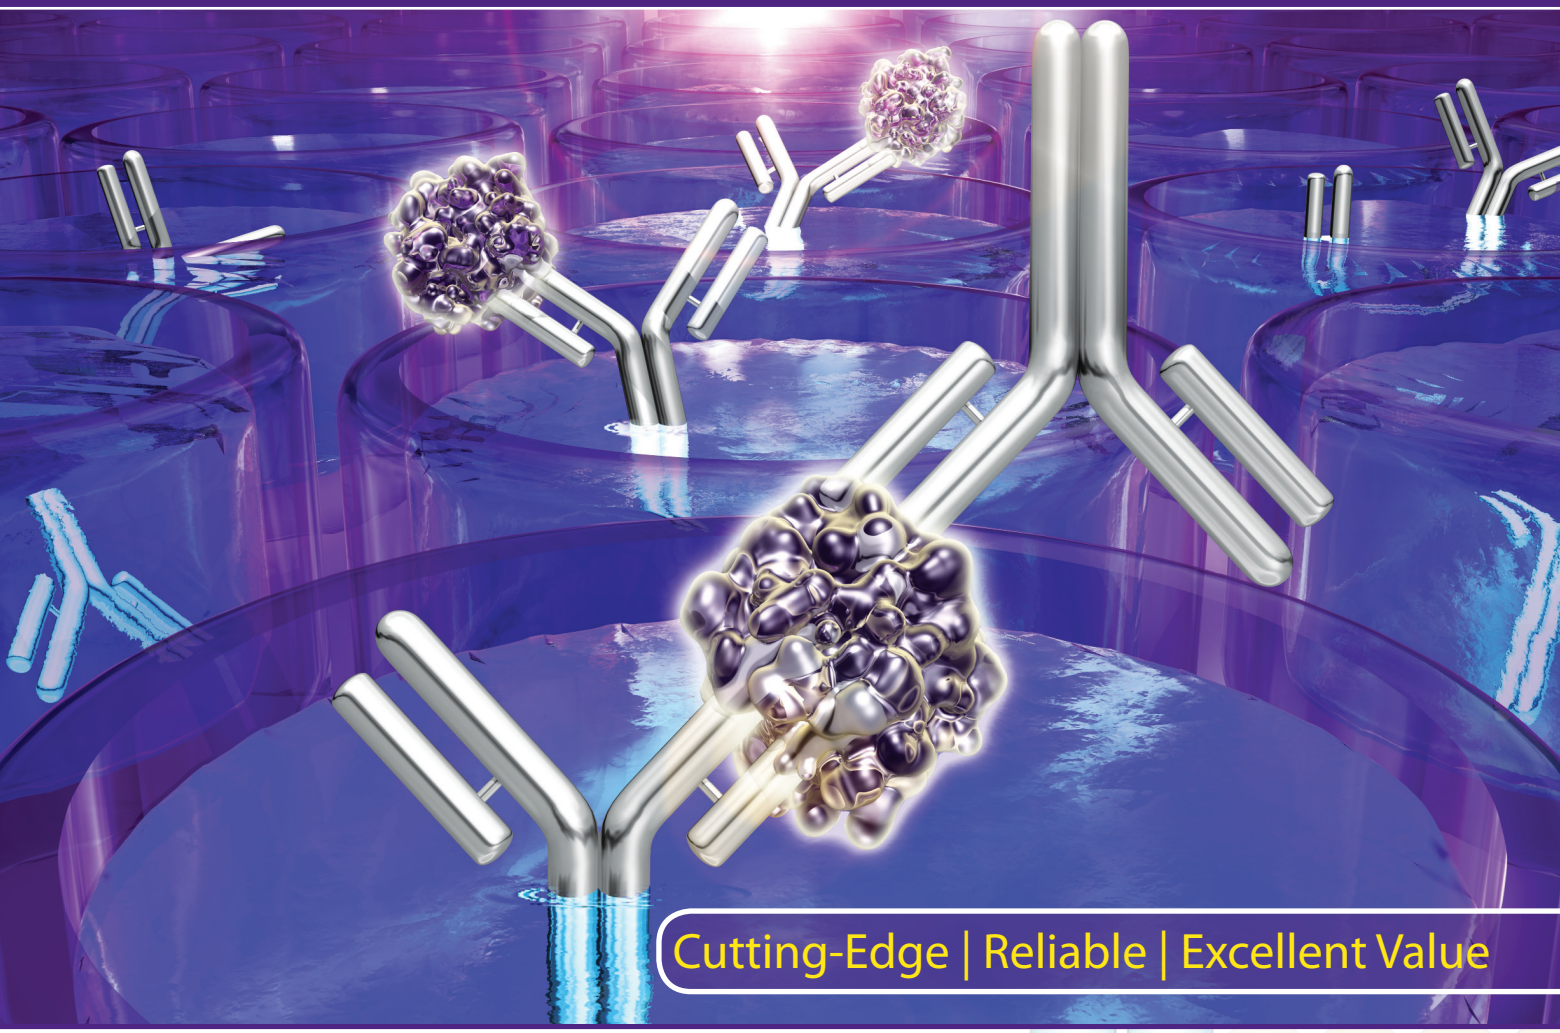
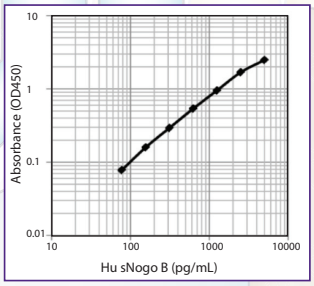
ELISA Kits and Sets from BioLegend



LEGEND MAX™ Kits with pre-coated plates for speed and ease-of-use, with over 60 human, mouse, and rat specificities available.

ELISA MAX™ Sets for the best value and flexibility, with over 70 specificities available.



Buy direct from the manufacturer. BioLegend develops and manufactures all ELISA Kits and Sets in our new state-of-the-art facilities in San Diego, CA. Learn more at **biolegend.com/elisa**

Delivering Novel Analytes:

- 4-1BB
- Soluble DcR3
- FGL-2
- Granulysin
- IL-32α
- IL-33
- Lactadherin
- LAP
- Active MIF
- Soluble Nogo-B
- Free Active TGF-β1
- TSLP

Cytokine ELISA kits

www.cellsciences.com

These high quality research immunoassays are useful for the *in-vitro* quantitative and qualitative determination of cytokines from human serum, plasma and cell culture supernatant. Diaclone ELISA kits are ready-to-use, with pre-coated 12 x 8 strip plates, standards, buffers, detection antibody, conjugate and substrate. Do-it-yourself matched antibody pair kits for ELISA are also available. These Diaclone ELISA sets offer the same quality, sensitivity and performance as Diaclone ELISA kits and are reasonably priced. Diaclone ELISA sets include all necessary reagents for the immunoassay; capture antibody, biotinylated detection antibody, streptavidin - HRP, TMB, and enough lyophilized antigen to make one standard curve per plate. Visit our web site for complete information, pricing and protocols. Accuracy and reliability guaranteed; all reagents have been extensively validated according to the ISO 9001 quality system.

Human Cytokines & Growth Factors	Range
GM-CSF	8-500 pg/ml
IFN-α	8-500 pg/ml
IFN-γ	12.5-400 pg/ml
IFN-γ high sensitivity	0.78-25 pg/ml
IL-1α	31.2-1000 pg/ml
IL-1β	15.6-500 pg/ml
IL-2	31.2-1000 pg/ml
IL-2 high sensitivity	1.87-60 pg/ml
IL-4	1.1-35 pg/ml
IL-4 high sensitivity	0.31-10 pg/ml
IL-5	7.8-250 pg/ml
IL-6	6.25-200 pg/ml
IL-6 high sensitivity	1.56-50 pg/ml
IL-7	6.25-200 pg/ml
IL-8	62.5-2000 pg/ml
IL-10	12.5-400 pg/ml
IL-10 high sensitivity	1.56-50 pg/ml
IL-12/p70	6.25-200 pg/ml
IL-12 high sensitivity	0.78-25 pg/ml
IL-12/p40 + p70	62.5-2000 pg/ml
IL-13	3.12-100 pg/ml
IL-15	31.25-1000 pg/ml
IL-17A	3.12-100 pg/ml
IL-17F	15.6-500 pg/ml
IL-17A/F	15.6-500 pg/ml
IL-23	78-5000 pg/ml
IL-27	31.25-1000 pg/ml
IL-31	31.25-1000 pg/ml
IL-33	31.25-1000 pg/ml
IP-10	6.25-200 pg/ml
MCP-1	16-1000 pg/ml
TGF-β1	0.5-30 ng/ml
TGF-β2	31.25-1000 pg/ml
TNF-α	25-800 pg/ml
VEGF-A	15.6-1000 pg/ml
VEGF-R1	0.16-10 ng/ml

Human Cytokine Receptors	Range
CD25/IL-2R	68.75-2220 pg/ml
CD116/GM-CSF R	31.25-1000 pg/ml
CD117/c-KIT	0.31-10 ng/ml
CD124/IL-4R	31.25-1000 pg/ml
CD126/gp80	31.25-1000 pg/ml
CD130/gp130	56.25-1800 pg/ml
CD213a2/IL-13Rα2	156-5000 pg/ml
CD138/SYNDECAN-1	8-256 ng/ml

Mouse Cytokines	Range
CD40L	0.31-20 ng/ml
Eotaxin	31.3-2000 pg/ml
GM-CSF	15.6-500 pg/ml
IFN-γ	31.25-1000 pg/ml
IL-1α	7.8-500 pg/ml
IL-2	15.6-500 pg/ml
IL-4	3.9-250 pg/ml
IL-5	7.8-500 pg/ml
IL-6	15.6-500 pg/ml
IL-10	31.25-1000 pg/ml
IL-12	31.25-2000 pg/ml
IL-13	7.8-500 pg/ml
IL-15	6.25-400 pg/ml
IL-17A	15.6-500 pg/ml
IL-17F	62.5-4000 pg/ml
IL-22	7.8-500 pg/ml
IP-10	7.8-500 pg/ml
MCP-1	15.6-1000 pg/ml
TGF-β1	0.5-30 ng/ml
TNF-α	31.25-1000 pg/ml
VEGF-A	62.5-4000 pg/ml

Rat Cytokines	Range
GM-CSF	7.8-500 pg/ml
IFN-γ	31.25-1000 pg/ml
IL-1α	15.6-1000 pg/ml
IL-1β	31.25-2000 pg/ml
IL-2	62.5-2000 pg/ml
IL-4	31.25-100 pg/ml
IL-6	31.25-2000 pg/ml
IL-10	15.6-1000 pg/ml
IL-17A	1.6-100 pg/ml
TGFβ1	0.5-30 ng/ml
TNF-α	31.25-1000 pg/ml
VEGF-C	47-3000 pg/ml

ELISA kits for human soluble antigens, adhesion molecules and apoptosis markers are also available.

Stable Cell Lines & Reporter Assay Systems

Cell Lines for Treg, Th17 & Type I Interferon Activation

- Optimized target gene expression: TLRs, IL-17A, FOXP3, IL-8, TLR3/IFNβ, TLR3/ISRE SEAP or luciferase expression
- Extensive functional characterization
- Broad working range dynamics
- Sensitivity
- Adaptable scalability for high-throughput screening
- The most optimal & advanced systems available today

SEAP REPORTER ASSAYS

● NF-κB/SEAP RAW Reporter Cell Line

Stably transfected mouse RAW 264.7 cells with NF-κB SEAP that constitutively express TLRs 1, 2, 3, 4, 6, 7, 8, 9 & MD2.

Cat No	Description	Species
IML-120	TLR/NF-κB/SEAP Transfected RAW Cells	Mouse

● SEAPorter™ Assay Kits

Secreted Alkaline Phosphatase Reporter Assay for fast and sensitive detection of NF-κB or non-NF-κB activity.

Cat No	Description
IML-515	NF-kB SEAPorter Assay Kit
10055K	SEAPorter Assay Kit

● TLR HEK 293 Stable Cell Lines

HEK 293 cells stably transfected with plasmids for human or mouse Toll-Like Receptors. All human TLRs 1-10 and mouse TLR 11, 12, 13.

● TLR/NF-κB/SEAPorter™ HEK 293 Stable Cell Lines

HEK 293 cells stably co-transfected with human or mouse TLR & NF-κB reporter genes. All human TLRs 1-10 and mouse TLR 11, 12.

LUCIFERASE REPORTER ASSAYS & LUCPorter™ CELL LINES

● NEW Treg & Th17 Activation Pathways

Treg and Th17 Activation Analysis and Luciferase Read-outs HEK 293 cell stably co-transfected with IL-17A or FOXP3 promoter and Renilla Luciferase Reporter genes provide opportunity to study Th17 and Treg activation pathways.

● NEW Type I Interferon Activation Pathways

TLR3/IFNβ/LUCPorter™ and TLR3/ISRE/LUCPorter™ HEK293 cell lines stably transfected with full-length human TLR3, optimized Renilla Luciferase Reporter Gene (RenSP) under the transcriptional control of the human IFNβ or ISRE enabling Type I Interferon activation analysis.

Cat No	Description	Species
IML-301	IL-17A	Human
IML-302	FOXP3	Human
IML-303	IL-8	Mouse

Cat No	Description	Species
IML-304	TLR3/IFNβ	Human
IML-305	TLR3/ISRE	Human

● IL-17A & FOXP3 Plasmids

Expression vector constructs for use in induction of IL-17A or FOXP3 promoter activity in LUCPorter™ Cell Lines.

Cat No	Description
IMP-121	RORγ (IL-17A Promoter Induction)
IMP-122	RORγ(t) (IL-17A Promoter Induction)
IMP-123	RUNX1 (FOXP3 Promoter Induction)

● LightSwitch™ Luciferase Reporter Assays

The LightSwitch Luciferase Assay Reagent™ enables one-step reagent addition to measure luciferase reporter signals.

Cat No	Description	Quantity
LS010	LightSwitch	10 mL
LS100	LightSwitch	100 mL

LightSwitch™ is a trademark of SwitchGear Genomics.

Design your own complete Reporter Assay System

Looking for an affordable multi-color solution?

iCyt and the ec800 multi-laser analyzer have the answer

Violet Laser 405nm

Brilliant Violet™ 421
Pacific Blue™
Brilliant Violet™ 570
Brilliant Violet™ 605
Brilliant Violet™ 650

Blue Laser 488nm

FITC, Alexa Fluor® 488
PE
PE-Cy5, PerCP
PE-Cy5.5, PerCP-Cy5.5
PE-Cy7

Green Laser 561nm

PE
PE-Cy5
PE-Cy5.5
PE-Cy7

Red Laser 642nm

APC, Alexa Fluor® 647
Alexa Fluor® 700
APC-Cy7

iCyt has the right combination of lasers and fluorochromes for your research needs.

The ec800 Flow Cytometry Analyzer has 1,2,3, or 4 laser line choices used in combination with 4, 5, or 6 PMT's.

Our portfolio of over 8,000 reagents features all the most popular clones for human, mouse, and rat research in concentrated formats for cost-effectiveness and multi-color mixing options.

It's about time

Fast forward your research with

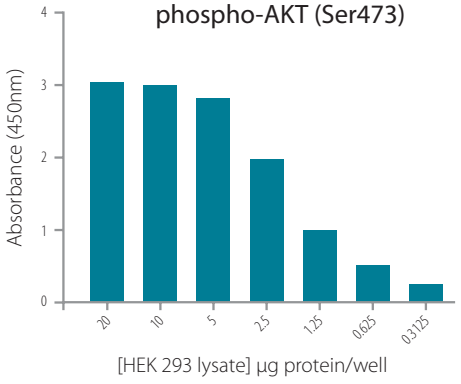
1-hour, 1-wash phospho ELISAs

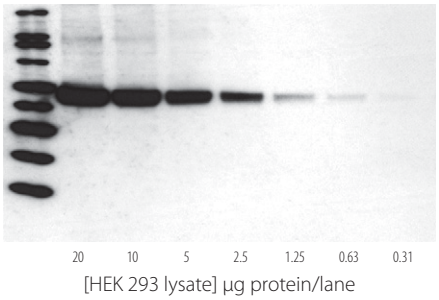
eBioscience®
high performance immunoassays

InstantOne™ ELISA

The evolution of phospho ELISAs leaps forward with the efficient sensitivity and flexibility of InstantOne ELISAs.

- **Fast:** Less than 1/3 the time of traditional ELISAs
- **Easy:** 1/4 the effort with only 1 wash step
- **Flexible:** Enables the detection of total and/or phospho protein levels of a single protein up or down a pathway on a single plate
- **Sensitive:** Meeting or exceeding industry standards with only 2-3,000 cells needed
- **Compatible:** Colorimetric detection; utilizes standard plate readers
- **Complete:** Over 30 kits available, with more coming soon





HEK cells are treated with 20% FBS for 15 min prior to lysis.

Follow us, engage with us and challenge us to support your studies.

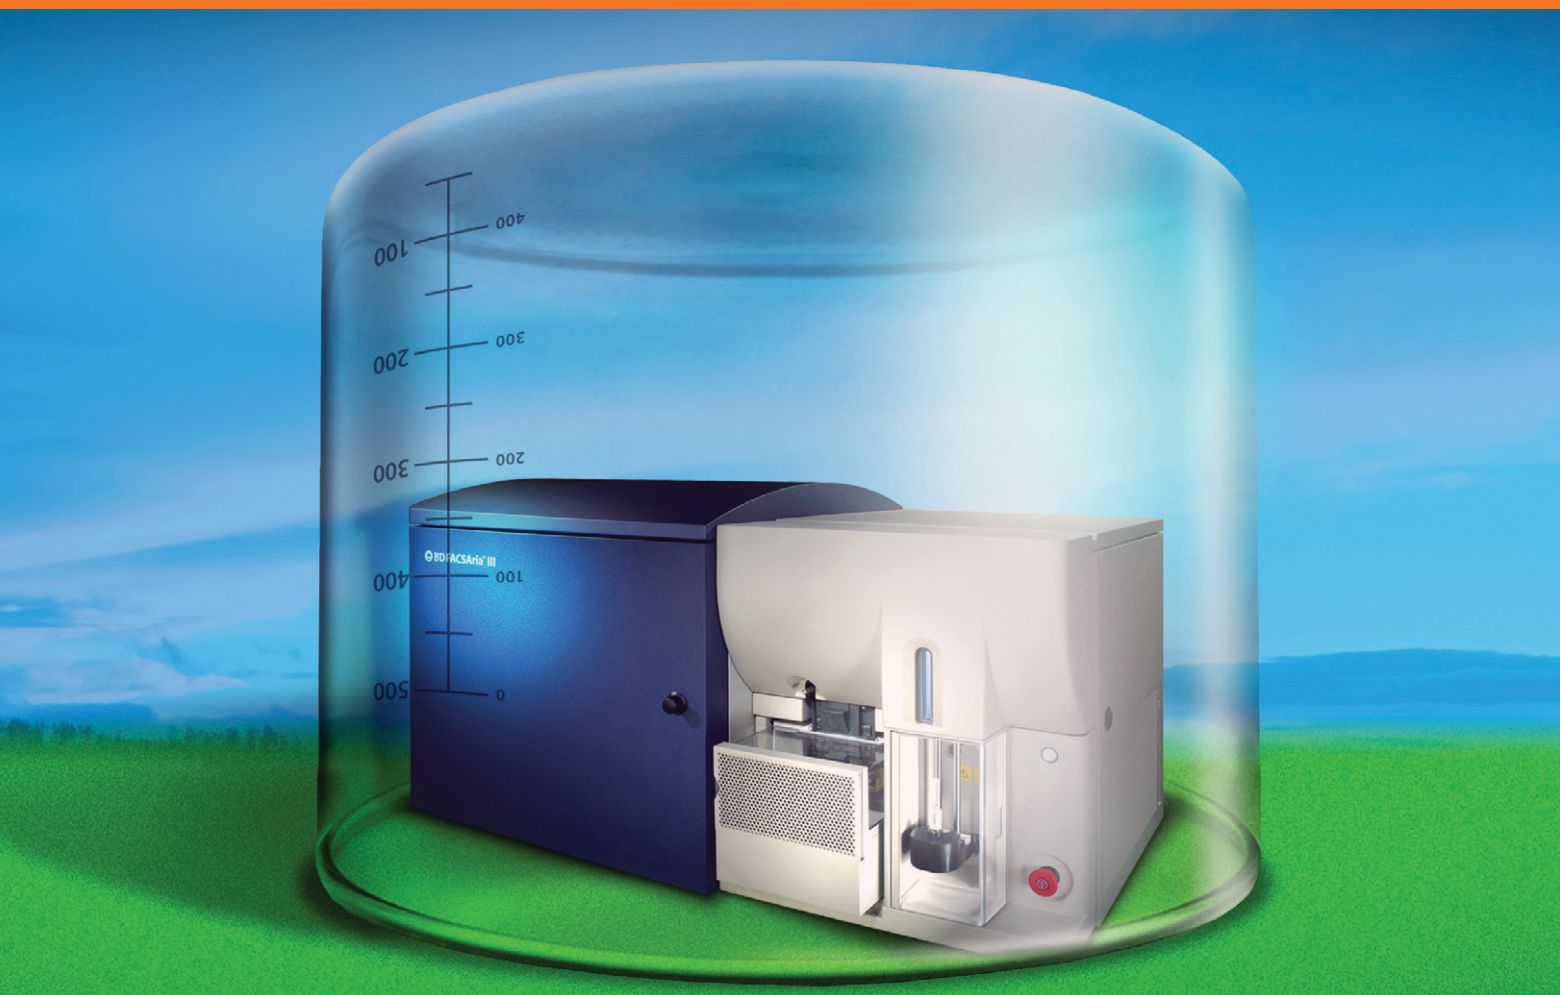
Enhanced biological safety for flow cytometry.

Protecting people, products, and the environment.



BD

Helping all people live healthy lives

A high standard of safety.

Biological safety in flow cytometry is a growing issue for all labs and another reason you can depend on BD Biosciences to continually innovate to improve your workflow and results.

Biosafety cabinets developed for our instruments provide personal and environmental protection from harmful agents inside the cabinet, as well as prevention of contamination of the cells you're working with.

BD Biosciences works with a range of cabinet manufacturers for biosafety protection in cell sorting. For more information about these biosafety solutions to ensure the highest level of safety for your lab, visit **bdbiosciences.com/go/biosafety**.

stevewest@ads-theji.org

Here's your chance to work for the #1 Respiratory Hospital in the U.S.!

ASSISTANT or ASSOCIATE PROFESSOR in tumor immunology

National Jewish Health Department of Medicine with the Integrated Department of Immunology at University of Colorado School of Medicine, is seeking candidates to fill a tenure-track position in tumor immunology at the ASSISTANT or ASSOCIATE PROFESSOR level in the Thoracic Oncology Division.

We are seeking candidates pursuing innovative research in basic and/or translational immunology related to solid tumors, especially lung cancer, who will bring novel technology and expertise to our institution. The applicant should have a Ph.D., M.D., or equivalent degree; a substantive record of publications in peer-reviewed journals; demonstrated interest in lung research, and the potential to develop a competitive independent research program. The ideal candidate would complement the existing areas of research and actively pursue collaborations with basic and clinical scientists to provide collaborative leadership in building the research program.

To apply, submit a cover letter, a curriculum vitae, and a brief statement of current and future research interests, as well as names and contact information of three professional references to: Jeffrey A. Kern, MD, Chief, Division of Oncology at National Jewish Health, c/o Margorie Neel, NeelM@NJHealth.org or by fax to 303-398-1476.
