reagents:

We're On Your Wavelength

Whatever your flow cytometry needs and challenges, Beckman Coulter is right there for you with the high quality reagents you need to advance your research.

Choose reagents for research applications that range from basic immune monitoring to hematological malignancies, dendritic cells, T cells, B cells and more. Our complete product portfolio includes monoclonal antibodies, tandem dyes, dye-conjugated antibodies, and cocktails, manufactured in ISO-certified facilities. And our easy-to-use online store makes ordering a breeze.

Visit www.BeckmanCoulterReagents.com to view our product portfolio, check out our current sample offers – and see for yourself how Beckman Coulter has what you need.

fast track to success.

Research Use Only. Not for use in diagnostic procedures.

Sorting made simpler.

Maximize safety without compromising workflow.

MOFLO ASTRIOS

Maximize safety for your lab operators with MoFlo Astrios, the leading edge cell sorter from Beckman Coulter.

With its unique integrated Class II biosafety cabinet and aerosol evacuation system, the MoFlo Astrios, reduces risk through a three stage interlock to monitor changing environmental conditions that could interfere with aerosol evacuation.

The result: an intelligent approach to biosafety as your lab sorts a broad range of moderate- to high-risk agents.

Visit www.Astrios.com to download Application Notes – and read for yourself how MoFlo Astrios can help you rise to your most demanding research challenges.

Shift Your Data Analysis Into High Gear!

Flow cytometry science may be complex, but it doesn't have to be hard. Kaluza Analysis Software from Beckman Coulter is easy to learn, easy to use, and drives true innovation in data manipulation and analysis.

With Kaluza you can power through complex multicolor data files, plots and events with ease – and effortlessly find that extra gear that gets you to your objective sooner.

Download your free 30-day trial today: www.KaluzaNow.com

SONY

See Everything.

The SP6800 Spectral Analyzer is Sony's newest and most unique flow cytometry-based system capable of seeing and analyzing all emission wavelengths between 500 nm – 800 nm which can expand cell and biomarker research.

By collecting all fluorescent emissions, the SP6800 Spectral Analyzer does not lose color information through narrow and specific wavelength bandpass filters. This system utilizes advanced spectral unmixing algorithms allowing researchers to more easily separate previously difficult or impossible overlapping fluorochromes and fluorescent proteins in a single run.

The SP6800 Spectral Analyzer provides cellular researchers true Results in Color.

Visit our website or contact a local sales representative for more information.

Introducing the new BD FACSAria™ Fusion

Integrated cell sorting and biosafety.

The fusion of safety, performance, and sorting.

The BD FACSAria™ Fusion cell sorter is built on the solid foundation of patented technologies, exceptional multicolor performance and ease-of-use that was first brought to the world of sorting by the launch of the BD FACSAria™ cell sorter in 2003.

Now this sorting know-how is combined with best-in-class biosafety expertise to create the BD FACSAria Fusion, a fully integrated advanced cell sorter and biosafety solution for research laboratories.

Helping all people
live healthy lives

The BD FACSAria Fusion has been verified to meet personnel and product protection standards for a Class II Type A2 biosafety cabinet, the National Sanitation Foundation International Standard 49, the European Standard 12469, and the Australian Standard AS 2252.2-2009.

Choose up to six laser wavelengths and 20 detector positions to measure up to 18 colors simultaneously.

How Researchers can Make Immunology Research Easier?

Sino Biological's Excellent Reagents Assist You in Your Goals

- 30%-80% cost savings
- Over 80% expressed in mammalian cells
- 17000+ reagents correlated with Immunology Research

High Bioactivity

TGF-beta1 Protein
(Cat.No.10804-H08H, Sino Biological)

High Sensitivity

Rabbit anti-human M-CSF R Antibody
(Cat.No.10161-R108, Sino Biological)

Low Background

Rabbit Polyclonal Antibody to human E-cadherin (Cat.No.10204-RP02, Sino Biological).

High Specificity

Beta-Tubulin Loading Control Antibody (Cat.No.100109-MM05, Sino Biological)

FACULTY POSITION AT THE FRED HUTCHINSON CANCER RESEARCH CENTER

The Fred Hutchinson Cancer Research Center is recruiting a full-time faculty member to join the Program in Immunology in the Clinical Research Division. Candidates seeking a position at the Assistant Member level are encouraged to apply, but candidates with more established research programs at the Associate Member level will also be considered. Applicants must have an MD or PhD degree (or equivalent), expertise in cellular and molecular immunology and cancer immunobiology, and an understanding of how these disciplines can be applied to immunotherapeutic approaches for the treatment of malignancy. The position will be laboratory-based, but can also include clinical research and medical oncology components. Candidates should demonstrate a track-record of high quality peer-reviewed publications, and evidence of independent research and of competitive funding potential. The Program in Immunology has broad expertise with a focus on bench-to-bedside translation, and priority will be given to applicants who have exhibited the ability to direct innovative and collaborative research in immunology that can enhance this mission of the program. This position will also involve opportunities to participate in the instructional activities of the Division. This would be a full-time faculty position based at the Fred Hutchinson Cancer Research Center, with a possible future joint appointment at the University of Washington in the Department of Medicine or Department of Immunology.

Candidates should send a C.V. and a concise statement of research plans and career goals to Immunology Search #2, Fred Hutchinson Cancer Research Center, 1100 Fairview Avenue North D3-100, P.O. Box 19024, Seattle, WA 98109-1024 or immunosearch2@fhcrc.org. Position will remain open until filled.

The Fred Hutchinson Cancer Research Center is an affirmative action, equal opportunity employer, dedicated to building a culturally diverse faculty and strongly encourages applications from women, minorities, individuals with disabilities, and covered veterans.

GRIP

Grant Review for Immunologists Program

Get a GRIP: An AAI program designed to help new investigators prepare their NIH grant proposals

AAI is pleased to offer a program to match new PIs with established PIs who have significant, successful grant writing careers. The Grant Review for Immunologists Program (GRIP) invites new PIs to submit an outline or NIH-style abstract to the GRIP coordinator who, with the assistance of a small volunteer subcommittee, will attempt to match the topic of the proposal with the research experience of an established PI. Matches will be made as quickly as possible to allow new PIs to meet upcoming NIH grant deadlines. Participation is open only to AAI members and is strictly voluntary. The program is not intended to supplant internal mentoring programs.

GRIP is now accepting both new PI and established PI participants. Please send your CV and a brief description of either your potential research project (new PIs) or grant reviewing experience (established PIs) to infoaai@aai.org (please write "GRIP" in the subject line).

Program details at www.aai.org/GRIP_rd.htm
