The Pinnacle of Discovery

Recombinant Proteins for Bioassay

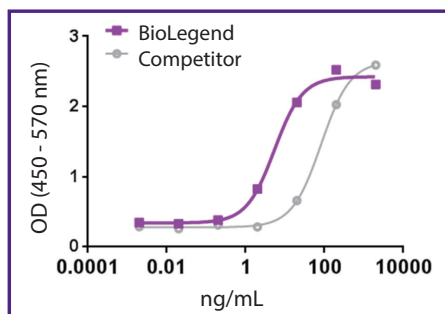

BioLegend has a large variety of recombinant cytokines, chemokines, growth factors, and proteinases (e.g., MMPs, Granzymes A and B). The **high quality** of our recombinant proteins anchor your research, and the **exceptional pricing** allows you to focus on reaching those lofty research goals.

BioLegend Recombinant Proteins are:

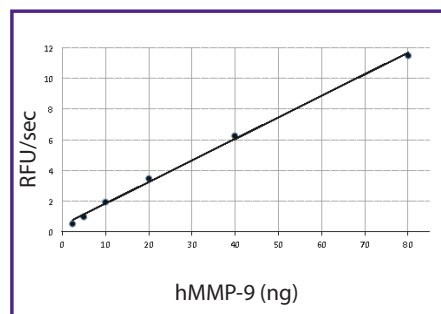

- Diverse, with over 400 human, mouse, and rat proteins.
- Exceptionally priced, to meet even the tightest budget.
- Functionally tested and validated for bioassay.
- Available in carrier-free and animal-free formats to suit your assay needs.

Recombinant Mouse FLT3L

Mouse FLT3L induces IL-6 production in murine myeloid leukemia cell line M1.

Recombinant Human MMP-9

The activity of monomeric hMMP-9 was measured with 10 μ M of fluorogenic MMP substrate, Mca-PLGL-Dpa-AR-NH₂, in the presence of 2.5, 5.0, 10, 20, 40, and 80 ng of activated hMMP-9. The activity of activated hMMP-9 is >800 pmole/min/ μ g.
