# AAI Fellowship Program for Career Reentry

## Fellowship Overview

This fellowship program provides one year of salary support to postdoctoral fellows who have taken a leave of absence of one year or more due to military obligations, personal or family medical leave, or other related family circumstances. These reasons may include recovering from a serious illness; providing elder or child care; fulfilling a military obligation; or relocating due to a spousal career transition.

## Eligibility

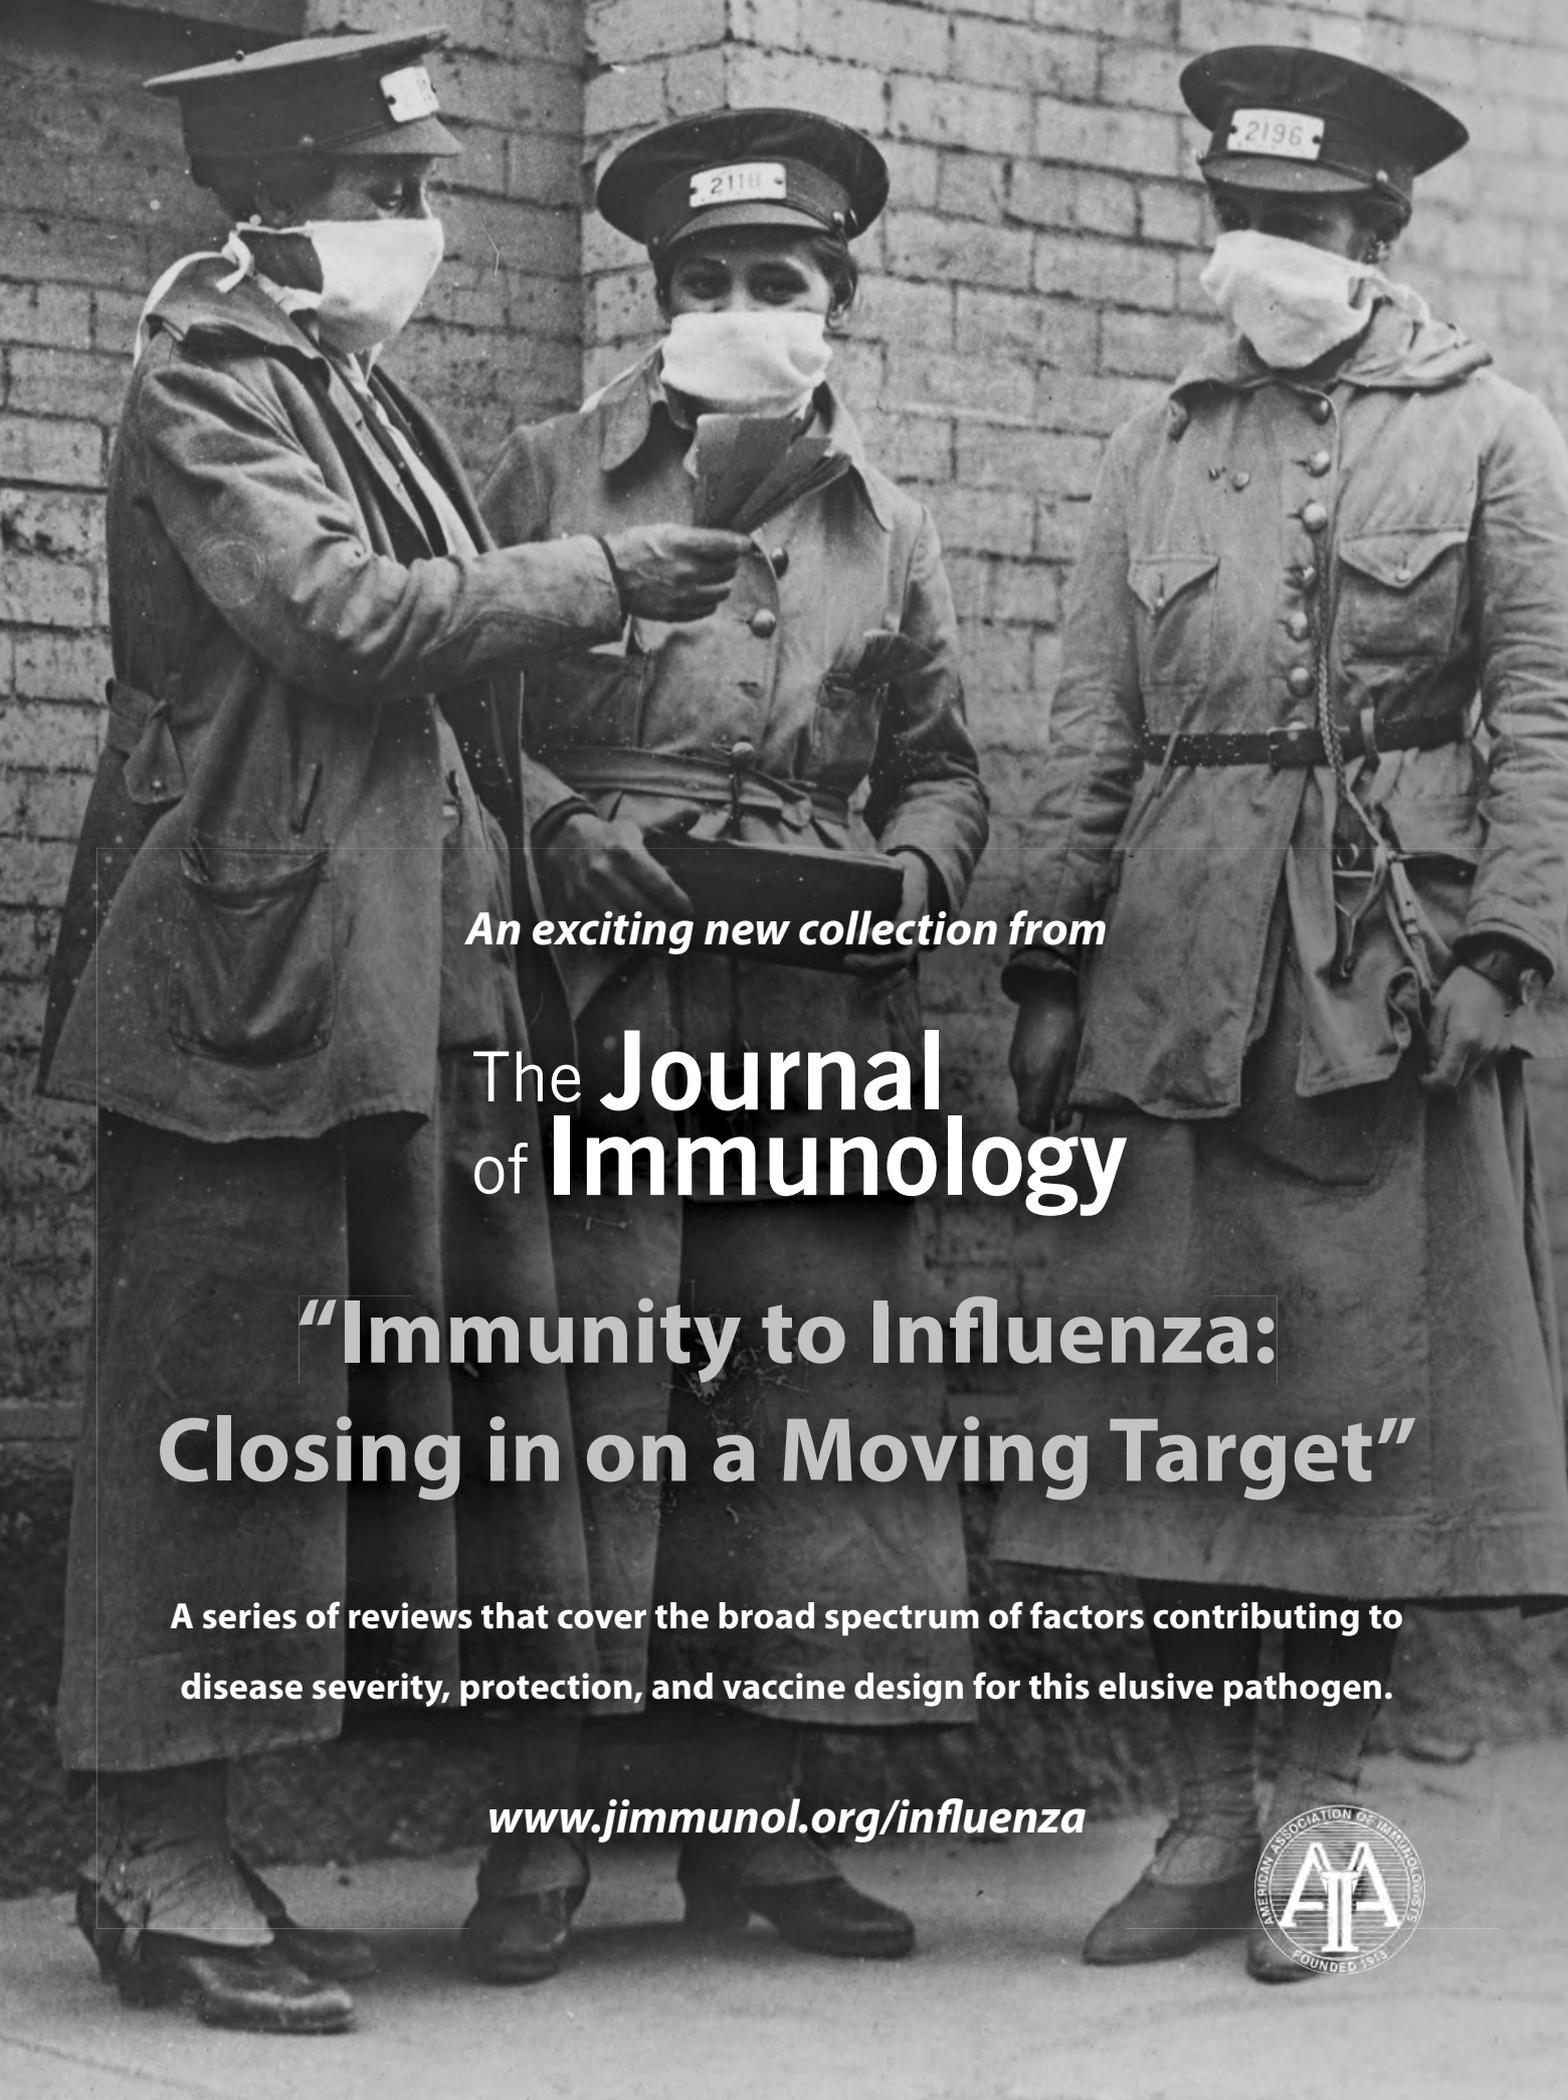

- An applicant must have a tentative written offer of appointment as a postdoctoral fellow.
- The fellowship must be in immunology or a related field.

Award consideration is based on a combination of the merit of the research project, quality of the training environment, research and career accomplishments, and career potential.

APPLICATIONS OPEN JUNE 3  
APPLICATIONS CLOSE SEPTEMBER 3

**For more information or to apply: [www.aai.org/Reentry](http://www.aai.org/Reentry)

# AAI Intersect Fellowship Program for Computational Scientists and Immunologists

## Fellowship Overview

Recognizing the vital role cross-trained scientists play in furthering immunology research, this fellowship program is intended to promote understanding and communication between immunology researchers and computational scientists. A PI may apply for a one-year fellowship which will support a postdoctoral fellow trained in basic bench research to train in computational science, or a postdoctoral fellow in computational science to train in an immunology research lab to learn basic immunological principles and laboratory techniques. Reciprocal 6-month exchanges between labs will also be considered.

<b>APPLICATIONS OPEN</b>	<b>JUNE 1</b>
<b>APPLICATIONS CLOSE</b>	<b>SEPTEMBER 12</b>

## Eligibility

One of the collaborating PIs must be an AAI member in good standing. If the PI is a research immunologist, he/she must be independent. Applicants may request salary support for a maximum of one postdoctoral fellow for one year, or two postdocs for six months each.

Trainees must be in years 1–5 of postdoctoral training in the physical/mathematical/computational sciences, immunology, or related fields. Postdoctoral fellows who have completed five years of training and transitioned into a second postdoctoral position will be considered on a case by case basis.

## Review Process

Award consideration is based on a combination of the qualifications of the applicant, the merit of the PI's proposed project, potential of the trainee, and the quality of the training environment.
