On the cover: The human gut symbiont *Bacteroides thetaiotaomicron* expresses one of eight capsular polysaccharides in a phase-variable manner. The individual capsules have a range of effects on the CD4 $^{+}$ T cell response to *B. thetaiotaomicron*—from antistimulatory to prostimulatory. The capsule is shown in yellow in a quick-freeze, deep-etch scanning electron micrograph. Hsieh, S., N. T. Porter, D. L. Donermeyer, S. Horvath, G. Strout, B. T. Saunders, N. Zhang, B. Zinselmeyer, E. C. Martens, T. S. Stappenbeck, and P. M. Allen. 2020. Polysaccharide capsules equip the human symbiont *Bacteroides thetaiotaomicron* to modulate immune responses to a dominant antigen in the intestine. *J. Immunol.* 204: 1035–1046.
