Biological Sample Values Measured by BioLegend Mini ELISA Plate Reader™ vs. Standard Plate Reader

Human serum, plasma, and the cell culture supernatant samples (n = 32) were assayed using LEGEND MAX™ Human PTX3 ELISA Kit (Cat. No. 446807). Optical density was read using a standard plate reader at 450 nm and the BioLegend Mini ELISA Plate Reader™ at 450 nm. Sample concentrations (pg/mL) were calculated and plotted for sample value correlation.

BioLegend products are manufactured in an ISO 13485:2016-certified facility to ensure the highest quality standards.
