On the cover: The neuronal miR-124 was downregulated by injecting the adeno-associated virus (AAV) vector delivering the miR-124 shRNA gene with a neuron-specific promoter hSyn into the spinal cord in chemotherapy-induced peripheral neuropathy mice. The mCherry (red) expressed by AAV-hSyn-miR-124 shRNA was mainly colocalized with NeuN labeled (green) neurons in the spinal cord. Li, X.-C., H. Chen, Y. Chen, Y.-X. Chu, W.-L. Mi, Y.-Q. Wang, and Q.-L. Mao-Ying. 2024. Spinal neuronal miR-124 inhibits microglial activation and contributes to preventive effect of electroacupuncture on chemotherapy-induced peripheral neuropathy in mice. *J. Immunol.* 212: 410–420.
