

THE JOURNAL OF IMMUNOLOGY

Manuscripts should be typewritten and carefully revised before submission and should be sent to Dr. Arthur F. Coca, Pearl River, New York. Authors will be charged for space in excess of 20 printed pages; also for all illustrations and for tabular matter in excess of 10 per cent of the text space.

THE JOURNAL OF IMMUNOLOGY is issued monthly. Two volumes a year are issued. *Twenty-five reprints*, without covers, of articles will be furnished to contributors free of cost when ordered in advance. A table showing cost of reprints, with an order slip, is sent with proof. Orders for purchased reprints must be limited to 1,000 copies.

Published monthly, beginning January, 1929. (From 1916-1925, and in 1928 Volumes I-X, inclusive, and Vol. XV published bi-monthly. Two volumes per year were published during 1926-1927.)

The subscription price is \$5.00 per volume. For countries outside the Postal Union, add 50 cents a volume. Two volumes ordered at the same time, \$9.00; overseas, \$10.00. The subscriptions of members of the American Association of Immunologists are included in the membership dues and are handled by the Association's Treasurer, Dr. Arthur F. Coca, Pearl River, New York. All other subscriptions should be sent to the publishers.

Claims for copies lost in the mails must be received within 30 days, domestic (90 days, foreign) of the date of issue. Changes of address must be received at least two weeks in advance of issue.

Correspondence concerning business matters should be addressed to The Williams & Wilkins Company, Publishers of Scientific Journals and Books, Mount Royal and Guilford Avenues, Baltimore, U. S. A.

New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value of such numbers will be credited to the next volume, and the renewal invoice therefore adjusted accordingly.

Subscriptions should be renewed promptly—To avoid a break in your series, subscriptions should be renewed promptly. The publishers cannot guarantee to supply back issues on belated renewals.

Subscriptions, new or renewal, should be sent to the Publishers or to Agents listed below.

AGENTS

For Argentina and Uruguay: Beutelspacher y Cia, Sarmiento 815, Buenos Aires.

For Australia: Angus & Robertson, Limited, 89-95 Castlereagh Street, Sydney.

For Belgium: Henri Lamertin, 58 Rue Coudenberg, Bruxelles.

For the British Empire, except Australia and Canada: Baillière, Tindall & Cox, 8 Henrietta St., Covent Garden, W C 2, London, England.

For Canada: Wm. Dawson & Sons, Ltd., 91 Queen Street East, Toronto.

For China: Commercial Press Ltd., Paoshan Road, Shanghai, China.

For Denmark: H. Hagerup's Boghandel, Gothersgade 30, Kjobenhavn.

For France: Emile Bougault, 48 Rue des Ecoles, Paris.

For Germany: B. Westermann Co., Inc., Zimmerstrasse 35-41, Berlin SW-68.

For Holland: Scheltema & Holkema, Rokin 74-76, Amsterdam.

For Japan and Korea: Maruzen Company, Ltd. (Maruzen-Kabushiki-Kaisha), 6 Nihonbashi Tori-Nichome, Tokyo; Fukuoka, Osaka, Kyoto, and Sendai, Japan.

For Spain: Ruiz Hermanos, Plaza de Santa Ana, 13, Madrid.

Peptones for Culture Media

This group of Peptones, Difco, is prepared expressly for use in bacteriological culture media. When used alone or in combination with each other these peptones adequately meet the nutritional demands of bacteria in culture. The nitrogen content of each peptone is present in forms which are readily available for bacterial metabolism.

Bacto-Peptide

Bacto-Peptide is recommended as the standard peptone for the preparation of all routine culture media as well as those for special research investigations. It is rich in readily available forms of nitrogen and forms brilliantly clear solutions in the usual concentration. In a one per cent. solution Bacto-Peptide has a reaction of pH 7.0.

Neopeptide, Difco

Neopeptide possesses exceptional growth-promoting properties. It is free from the toxic elements which tend to inhibit or prevent the growth of delicate pathogenic bacteria, and is excellently suited for the propagation of these fastidious organisms. Luxuriant growth of many discriminating bacteria is obtained from minute inocula in culture media prepared with Neopeptide.

Proteose-Peptide, Difco

Proteose-Peptide is an excellent ingredient for culture media for propagation of the pathogenic bacteria. It is rich in the higher forms of nitrogen required by these organisms. The longevity of the strains is increased and their virulence is maintained for long periods of time when the organisms are cultivated in media containing this peptone as the source of nitrogen.

Bacto-Tryptone

Bacto-Tryptone is recommended for use in the detection of indol production by bacteria. It yields highly accurate results after relatively short periods of incubation. Bacto-Tryptone is also an excellent nutriment for many fastidious types of bacteria, particularly those of the lactobacillus group.
