

THE TROUBLED MIND

By Charles S. Bluemel, M.D., L.R.C.P., M.R.C.S.,

MEDICAL SUPERINTENDENT, MOUNT AIRY SANITARIUM, DENVER

Cloth, 523 pages, \$3.50 1938

This book presents a description of nervous and mental diseases in simple terms, a discussion which brings forward the problem in all of its ramifications, follows it up into religion, crime, business, advertising, politics, peace, war.

The author ingeniously points out the line of demarcation between the normal and the troubled mind, illustrating his statements with carefully chosen case histories. Notwithstanding its basic soundness, the book does not present a dull system nor a scheme of rigid classification, but accentuates the facts by which the psychopaths as the ubiquitous disturbers of the peace can be distinguished from the harmless victims of mental illness. You step ahead with the book in understanding the workings of the human mind—whether deranged or not.

Read THE TROUBLED MIND and safeguard better the normal mind and its functioning.

The Williams & Wilkins Company

Baltimore

New — Thorough — Authoritative — Practical

A Clinical Pathology with emphasis on interpretation of results and their application to the problems of diagnosis.

Textbook of Clinical Pathology

By twelve outstanding contributors

Edited by ROY R. KRACKE, Emory University, Ga.

574 pages, 295 illustrations, 31 plates, 19 in color, \$6.00

Twelve outstanding authorities, highly qualified as teachers and practitioners of the various divisions of clinical pathology present the essence of laboratory diagnosis. Each has concentrated on the division of the subject he knows best—for the field has become too large for any one man to cover adequately. The approach is medical, and at least one reliable method is given for all laboratory procedures.

The illustrations are superior—one hundred of them entirely new. There are more full-page plates, mostly colored, than in any other book on clinical pathology.

WILLIAM WOOD & COMPANY

NON-CORROSIVE, RED LABEL MICRO SLIDES

7030

Assorted Sample Package

MICRO SLIDES, Non-Corrosive, Red Label, A.H.T. Co. Specification. Of hard glass, nearly pure white in color and guaranteed against corrosion in any climate. Thickness varies between 1.18 and 1.30 mm, with an average of 1.23 mm.

Special Slides. With velvet-finish ground edges, slightly beveled on the three-inch edge, and with rounded corners. Entirely free from bubbles, pits, nicks, and striae. Individually selected and offered as, in our judgment, *the best micro slide now available.*

Clinical Slides. With velvet-finish ground edges and rounded corners, i.e. identical with Special Slides except for the omission of the slight bevel on the three-inch edge and that selection is based upon the plate from which the slides are cut, rather than upon the individual slide, so that an occasional slide may be found with a slight defect. Offered as a superior slide for general work.

Glazed Edge Slides. Identical with Clinical Slides except as to finish of the edges and corners. These Glazed Edge Slides are manufactured by a new process which eliminates the edge grinding and consequent washing and drying, and results in a low price slide suitable for all routine and student use.

The glass from which our Special, Clinical and Glazed Edge Slides are made has been greatly improved in quality—particularly as to surface finish and uniform thickness—so that the three grades are identical as to stability, optical quality and planeness of surface, the above classification depending upon freedom from bubbles, pits, nicks and striae and in the finish of the edges and corners.

Some Micro Slides show cloudiness near the edge—and sometimes throughout the usable surface—as a result of the deposit of powdered glass in solution from the edge-grinding process, with too rapid drying and insufficient cleaning thereafter. All of our slides are free from this defect because of the procedure followed for cleaning and drying the Special and Clinical Slides after manufacture.

			Code Word
7030.	Micro Slides, Special, Non-Corrosive, Red Label, size 3 x 1 inches, as above described.		
	Packed in distinctive brown grained cartons containing $\frac{1}{2}$ gross. Per gross.....	\$1.10	Jwrgu
7030-B.	Ditto, Clinical. Per gross.....	.80	Jwckm
7030-C.	Ditto, Glazed Edge. Per gross.....	.60	Jwvol
	10% discount in case containing 25 gross, one catalogue number only		
	20% " " lots of 100 gross } 7030, 7030-B and 7030-C assorted in 25		
	25% " " 500 " } gross case units		

SPECIAL OFFER

A package containing twenty-four samples of each of the three grades of slides listed above, i. e. Special, Clinical and Glazed Edge, will be sent without charge to organized laboratories upon request.
