

The standard and most popular book of its day

BEST and TAYLOR

The Physiological Basis of Medical Practice

SECOND EDITION

The first edition, in 1937, of this now internationally famous book took the medical profession by storm. It was received with confidence and is now recognized by teachers and practitioners in all branches of medicine as the finest correlation of physiology with clinical medicine yet produced. Medical schools have almost universally accepted Best and Taylor as an ideal text book.

All chapters of the second edition have been brought up to date. Also, responding to numerous requests, the work now includes an additional section dealing comprehensively with all phases of special sense physiology.

"Best and Taylor" is "the standard and most popular book of its day . . . a bible to the junior clinician . . . as a reference book outstanding," to quote from the *New England Journal of Medicine*. Along with a concise discussion of the physiology of all systems, brought up to date, physicians welcome the continued interjection of remarks on the application to the study or treatment of specific disturbances.

"The keynote is comprehensiveness in relation to the subject as a whole."—*The Lancet*. The nine sections cover: Blood and Lymph, Circulation of the Blood, Respiration, Excretion of Urine, Digestion, Metabolism and Nutrition, Endocrines, Nervous System, Special Senses.

"The volume is worth many times its price . . . obligatory reading for all who have any interest—no matter how remote or how specialized—in the varied and innumerable problems of clinical medicine. A really remarkable book."—*American Journal of Clinical Pathology*.

1888 pages, 498 figures, \$10.00

By CHARLES H. BEST, M.D., Professor and Head of Department of Physiology, Research Associate in the Banting-Best Department of Medical Research **and** **NORMAN B. TAYLOR, M.D.**, Professor of Physiology. Both of the University of Toronto.

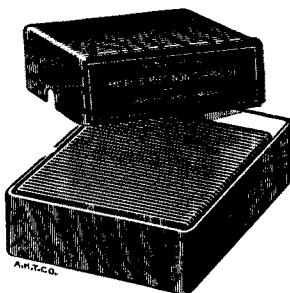

The Williams & Wilkins Company, Baltimore, Maryland

A.H.T. CO. SPECIFICATION

MICRO SLIDES

NON-CORROSIVE

RED LABEL

No. 7030. Special Micro Slides

7036-A. Slides with Etched End

MICRO SLIDES, Non-Corrosive, Red Label, A.H.T. Co. Specification. Of hard glass, nearly pure white in color and guaranteed against corrosion in any climate. Thickness varies between 1.18 and 1.30 mm, with an average of 1.23 mm.

The glass from which our Slides are made is of superior quality—particularly as to surface finish and uniform thickness—so that the three grades are identical as to stability, optical quality and planeness of surface, the following classification depending upon freedom from bubbles, pits, nicks and striae and in the finish of the edges and corners:

Special Slides. With polished edges, slightly beveled on the three-inch edge, and with rounded corners. Entirely free from bubbles, pits, nicks and striae. Individually selected and offered as, in our judgment, *the best micro slide now available*.

Clinical Slides. With polished edges and rounded corners, i.e. identical with Special slides except for the omission of the slight bevel on the three-inch edge and that selection is based upon the plate from which the slides are cut, rather than upon the individual slide, so that an occasional slide may be found with a slight defect. Offered as a superior slide for general work.

Glazed Edge Slides. Identical with Clinical Slides except as to finish of the edges and corners. These Glazed Edge Slides are manufactured by a new process which eliminates the edge grinding and consequent washing and drying, and results in a low price slide suitable for all routine and student use.

7030. Micro Slides, Special, Non-Corrosive, Red Label, size 3 × 1 inches, as above described. Packed in distinctive brown grained cartons containing ½ gross.

Per gross.....1.10 Code Word *Jwgu*

7030-B. Ditto, Clinical. Per gross.....80 Code Word *Jwkm*

7030-C. Ditto, Glazed Edge. Per gross.....60 Code Word *Jwvl*

10% discount in case containing 25 gross, one catalogue number only

20% discount in lots of 100 gross } 7030 to 7030-C, incl.,
25% " " " 500 " } assorted in 25 gross
case units

7036-A. Micro Slides, Special, Non-Corrosive, Red Label, size 3 × 1 inches, identical with No. 7030 but with 18 mm surface at one end etched evenly on both sides for marking. This etched surface has a superior velvet matte finish which takes leadpencil, hard wax pencil, India ink, "Labink" or similar preparations, and ordinary writing ink much better than the usual ground surface. Per gross.....1.75 Code Word *Juyyo*

7036-B. Ditto, Clinical, Per gross.....1.45 Code Word *Juyql*

10% discount in case containing 25 gross } one catalogue
20% " " lots of 100 gross } number only

Copy of new pamphlet, EE-121, "Micro Slides and Cover Glasses", sent upon request.
