

Best & Taylor: **PHYSIOLOGICAL BASIS OF MEDICAL PRACTICE**
6th edition

"The present edition of this book incorporates the most extensive revision since it was first published nearly two decades ago. Nearly every page has undergone some alteration, deletion, or addition, with many figures redrawn and others added. The 80 chapters supply a wealth of information for practicing physicians, medical students, specialists of every complexion in medical science, and laboratory investigators. Few works are worthy of the term 'indispensable.' This book occupies a commanding position for that appellation."
—*J.A.M.A.*

By CHARLES HERBERT BEST, C.B.E., M.A., M.D., Professor and Head of Department of Physiology, University of Toronto; and NORMAN BURKE TAYLOR, V.D., M.D., F.R.S., Professor of History of Medicine and Medical Literature, University of Western Ontario

1955 • 1357 pp., 588 figs. • \$12.00

**Cowdry: LABORATORY TECHNIQUE
IN BIOLOGY AND MEDICINE**
3rd edition

"The name of E. V. Cowdry will undoubtedly go down in history as one of the great correlators and educators in medicine of the first half of the twentieth century. An intimate understanding of the laboratory workers' problems in our generation, as well as an appreciation of the repercussions of technical developments in one field of progress in many others, is an essential prerequisite for the planning and execution of a book such as the one presently under review . . . as a source book for precise information about technical procedures, ranging from electron microscopy to macroscopic vascular injection techniques using modern plastics (and much in between), this volume is a basic essential to anyone starting a laboratory, as well as to the seasoned laboratory worker in biology. . . ."—*T. Gillman in South African J. M. Sci.*

By E. V. COWDRY, Ph.D., *Research Professor of Anatomy and Director of Wernse Cancer Research Laboratory, Washington University, St. Louis*
