

# THE JOURNAL OF IMMUNOLOGY

## *Information for Contributors*

Manuscripts should be carefully revised and the original should be sent to

DR. JOHN Y. SUGG  
*Journal of Immunology*  
Cornell Medical College  
1300 York Ave.  
New York 21, N. Y.

Authors will be charged for space in excess of 10 printed pages and also for all illustrations and tabular or graphic matter in excess of 10 per cent of the pages in each article.

Reprints must be ordered in advance. A table showing cost of reprints, with an order slip, is sent with proof. Orders for purchased reprints must be limited to 1,000 copies. The invoice for reprints will also include charges for illustrations, excess pages and tabular matter, if any

## *Instructions for the Preparation of Manuscript*

Copy should be typed double-spaced on one side only of 8½ x 11 paper. Even material that is to be set in a type size smaller than that of the main text (footnotes, references, etc.) should be double-spaced.

The author should supply a short title for use as a running head. This should be typed on a separate sheet as the first page of manuscript. Type the complete title of the article on a second sheet, and the authors' names and affiliations on a third sheet. All material that is to be set in a type size different from that of the main text should be typed on separate sheets. This includes tabular matter, case histories, quotations, formulas and other subsidiary matter in the text, footnotes, bibliographies, and legends for illustrations. Displayed formulas which are to be built up to more than one line of type, even if they are the same size type as the text, should be on a separate page. Legends should not be attached to or written on the illustration copy. Positions for tables and figures in the text may be indicated in the margin of the text page.

Manuscripts that do not conform to these instructions will be cut and rearranged so that the matter to be set in different sizes of type can be separated.

*Galley proof.* Authors will receive galley proofs of their papers set separately as outlined above. Galleys will be arranged in the following order: tables, running heads, footnotes, figure legends, text, bibliography. All material that has been cut from the body of the text will be inserted in its proper place in the galleys. This includes formulas, quotations, case histories, and other subsidiary matter. Manuscript will be arranged in this order: formulas, tables, footnotes, figure legends, text inserts including bibliography, text.

*Illustrations.* Copy for illustrations should be unmounted glossy photographs clearly identified as to number, author's name, and top of figure in soft crayon on the back. Graphs should be in India ink on bluelined paper. If larger than 9 x 12", they must be accompanied by glossy photographs within this size.

## WAYNE MOUSE BREEDER BLOX

A premium, complete ration, proved effective for intensive reproduction, lactation and growth of young.

Contains high balance of calories and protein necessary for top reproduction and growth.

Wayne Mouse Breeder Blox are routinely assayed biologically to guard against the presence of estrogenic activity. The feed is also tested at the time of packing for Salmonella. It contains no added antibiotics or anti-oxidants. To prevent outside contamination, the product is packed in polyethylene lined bags.

THE SYMBOL OF QUALITY

Write for full facts, and name of nearest Wayne Dealer

ALLIED MILLS, INC.

Laboratory Diets Div., Chicago 6, Ill.

One of the world's oldest and largest exclusive manufacturers of bird and animal diets.

## Paul: CELL AND TISSUE CULTURE

"The author's purpose is to provide an up-to-date account of the technics and applications of tissue culture, since rapid developments in the field have outdated some excellent texts. Standard procedures are emphasized. The volume is written in four parts: principles of cell culture; preparation of materials; special technics (source, primary explanation technics, disaggregated fresh tissue technics, cell strains, preservation, storage, and transportation of living tissues and cells); and special applications of cell and tissue culture methods."—*Lab World*

"Contains a remarkable amount of information for its length."—*H. A. Davenport in Stain Technology*

## IMMUNOLOGY

Official Journal of the

BRITISH SOCIETY FOR IMMUNOLOGY

Editor: J. R. MARRACK

VOL. III, NO. 3

CONTENTS

JULY 1960

- Transplantation Immunity in the Isologous Mouse Radiation Chimaera. By J. B. BRIDGES, J. F. LOUTIT AND H. S. MICKLEM
- Immuno-electrophoresis of Antitoxic Sera Using a Wide Range of Antigen-Antibody Ratios. By D. GALL
- Immuno-Histochemical Studies of Connective Tissue: The Use of Contrasting Fluorescent Protein Tracers in the Comparison of two Antisera. By D. G. SCOTT
- The Basophil Cells of Guinea Pig Bone Marrow and their Response to Horse Serum. By BEATRICE S. T. CHAN AND J. M. YOFFEY
- The Effect of Site of Implantation on Host Reaction to Ovarian Homografts. By DELPHINE M. V. PARROTT
- Physico-Chemical Characterization of the Cold Auto-Antibodies of Acquired Haemolytic Anaemia. By T. N. MEHROTRA AND P. A. CHARLWOOD
- Immunological Identification of the Pathological Cold Auto-Antibodies of Acquired Haemolytic Anaemia as  $\beta_2$ -M Globulin. By T. N. MEHROTRA
- The Adsorption of Antigen by Spleen Cells Previously Treated with Antiserum *In Vitro*. By S. V. BOYDEN AND E. SORKIN
- Electrophoretic Mobility of Human Antithyroglobulin Antibodies. By R. B. GOUDIE
- Book Reviews

The Subscription price in the United States and Canada is \$10  
for the annual volume of four parts (Single copies \$3 each)
